Projects:

1. Varasolutz Real Estate Website

Developed a full-stack real estate website with the following key features:

- Property listing and management with precise Google Maps location tagging.
- User registration and login system.
- Admin approval system for listing publication.
- Membership access with secure payment integration (UPI, net banking, credit/debit cards).
- Property comparison and loan calculation tools.

2. Weather Forecast Web Application

Developed a responsive web application using React to provide accurate weather forecasts.

- Integrated Open Weather API to fetch real-time weather data, including temperature, humidity, and wind speed.

- Implemented a user-friendly search feature allowing users to retrieve weather information by city or zip code.
- Applied responsive design techniques to ensure adaptability across various devices.

Achievements:

- Solved more than 450+ coding questions on 'Scaler' online learning platform.
